By- Aditya Sir

[NAT]

[1-Mark]

#Q. Suppose, G is a undirected connected complete graph with 4 vertices. How many BFS traversals are possible for Graph G _____?

Ans:- 24

	B	C	D
<u>A</u>	<u>3</u>	<u>2</u>	<u>1</u>

$$A \quad \underline{3} \times 2 \times 1 \longrightarrow 6$$

$$B \quad \underline{3} \times \underline{2} \times \underline{1} \longrightarrow 6$$

$$C \quad \underline{3} \times \underline{2} \times \underline{1} \longrightarrow 6$$

$$D \quad \underline{3} \times \underline{2} \times \underline{1} \longrightarrow 6$$

$$4 \times 6 = \underline{\underline{24}}$$

A	B C D
A	B D C
A	C B D
A	C D B
A	D C B
A	C B C

} → 6

$$6 \times 4 = \underline{\underline{24}}$$

Shortcut

$$\frac{4!}{0!}$$

#Q. Consider a following graph

G:

How many topological orders are possible for graph G:

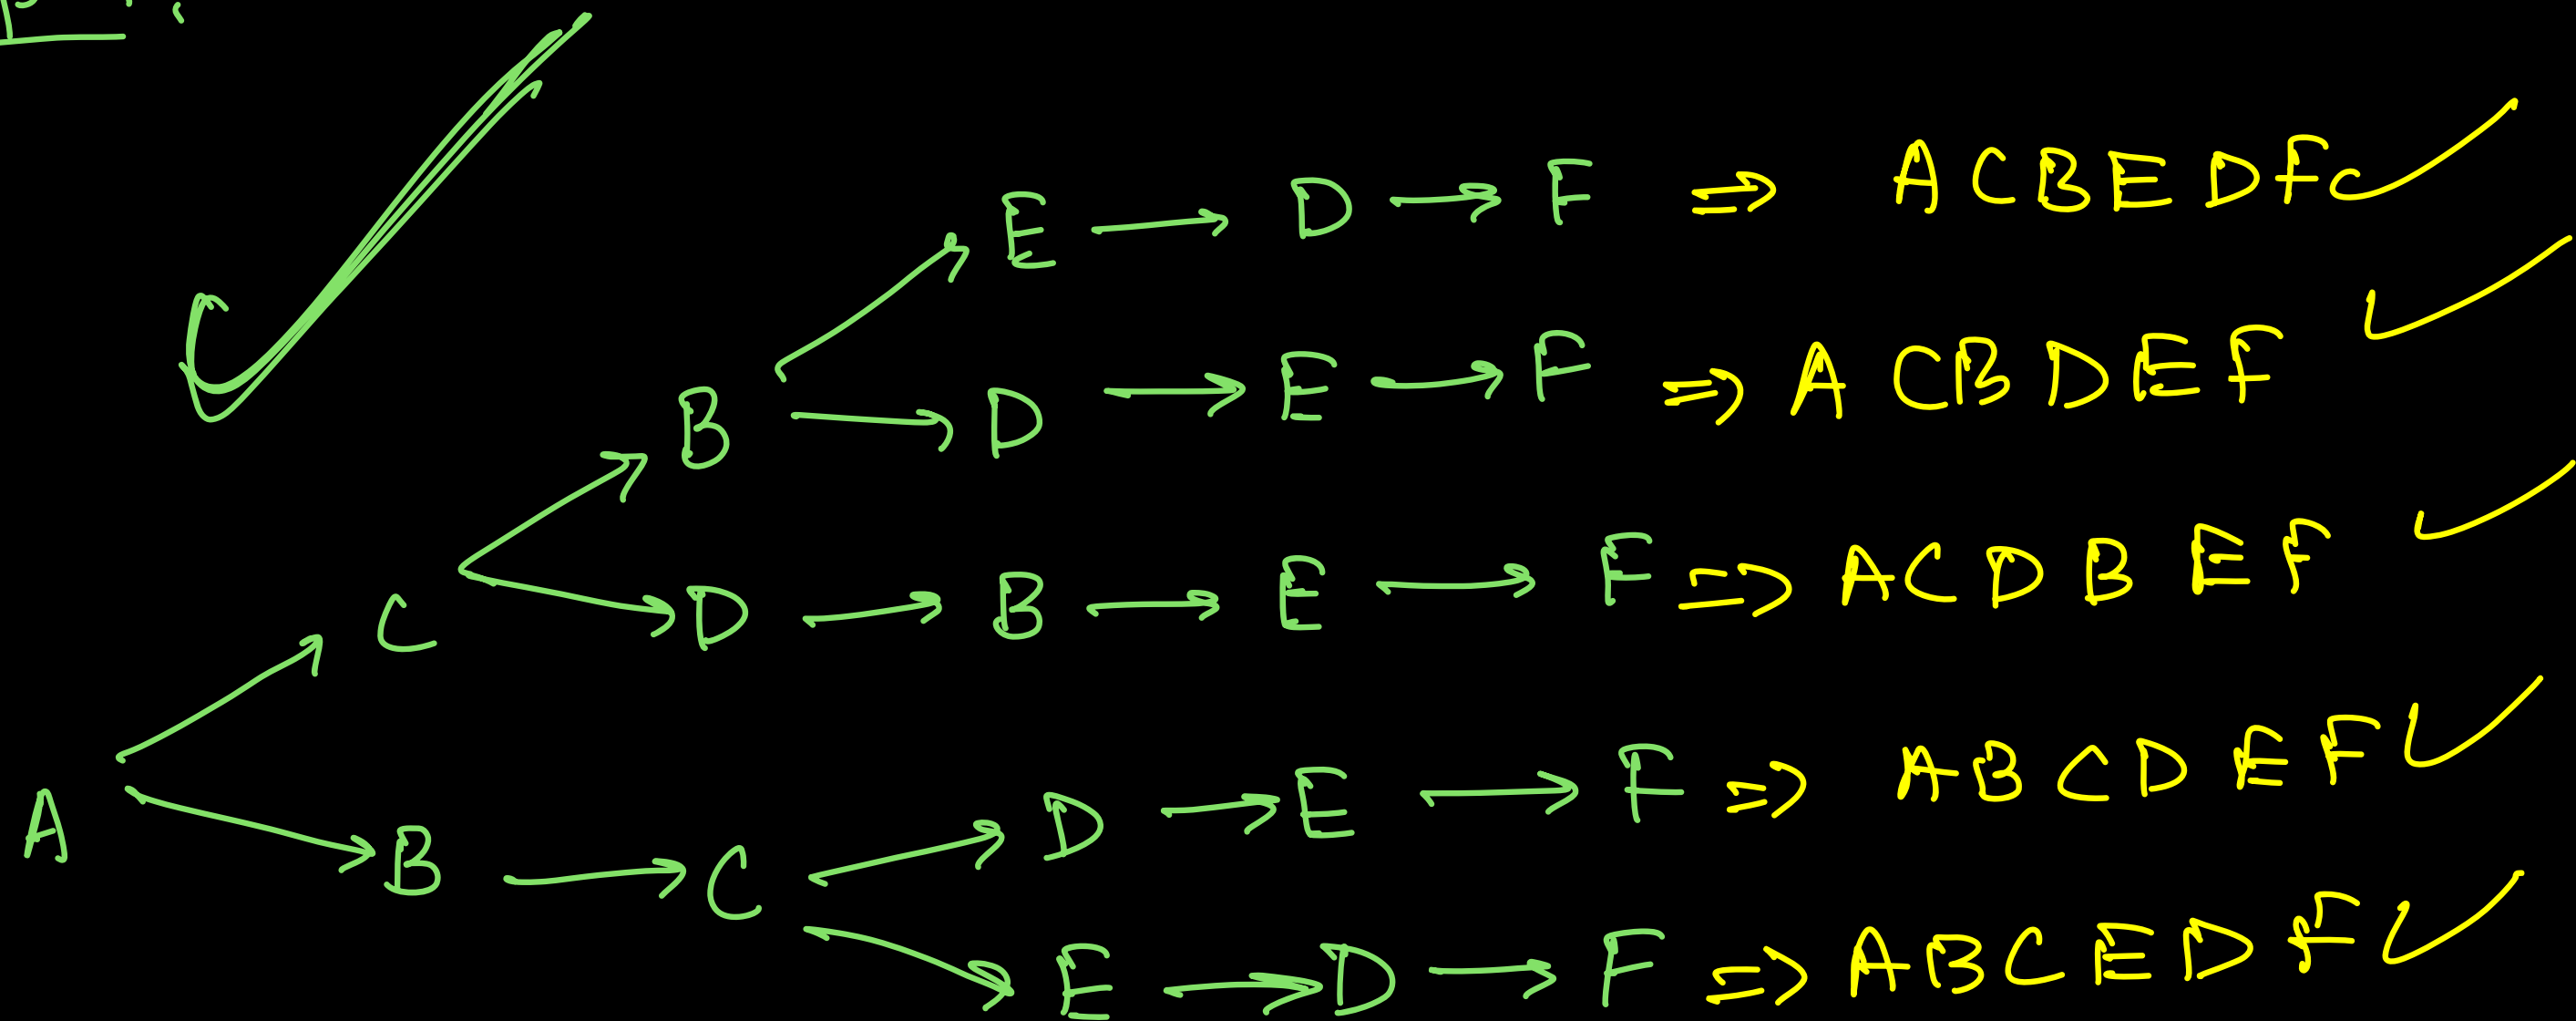

Source :- A

Sink :- F

Topo : A _____ F

Ans : 5

Appar :-

Shortcut:-

#Q. Consider the statements

✗ S1: Starting from vertex V_0 in a graph, the time required by DFS to find a path (if exists) to some vertex V is always less than that is required by BFS.

✗ S2: The space required by DFS is always less than that is required by BFS

Which of the following statement is true ?

WC: $O(n)$

Ans: D

A Only S1 ✗

B Only S2 ✗

C Both S1 and S2 ✗

☒ **D** Neither S1 Nor N2 is true

$$V_0 \rightsquigarrow V \quad (\underline{P \rightsquigarrow R})$$

① DFS :

✓ Case 1 :- $\underline{PR} QST \rightarrow 1 \text{ unit}$

Case 2 :- $\underline{P QST} R \rightarrow 4 \text{ unit}$

② BFS

Case 1 :- $\overset{\curvearrowright}{P} R QST \rightarrow 1 \text{ unit}$

✓ Case 2 :- $\underline{P Q} RST \rightarrow 2 \text{ unit}$

#Q. Consider the following Graph G:

Ans = 2

decided

Apply DFS on G starting at vertex P and selection of adjacent vertex in DFS ~~divided~~ by the Lexicographical order in Graph G, Q and S are adjacent to P. First it selects Q because Q comes first in Lexicographical order. Then what is the number of cross edge when the DFS performed on G is _____.

DFS starting at P

Types of edges:

1) Tree: ⑥

2) Forward: TV ①

3) Back: None

4) Cross: UV, UR

②

$n = 7$

[NAT]

[2-Marks]

#Q. Consider the following graph

Ans: 4

After applying DFS traversal starting from node 'A' in above graph if forward edges are x and cross edges are y then, $(x)^y$ is-

NOTE: Visit adjacent nodes in lexicographical order (B before C)

DFS Start at A

n = 8

1) Tree : 7

2) Forward : AF, EG (2)

3) Back : DA, FB (2)

4) Cross : HG, DH → (2)

$$x = 2$$

$$y = 2$$

$$x^y = 2^2 = \boxed{4}$$

#Q. Consider the following graph

Ans:- (A, C)

Which of the following represents the valid DFS traversal?

A

P S W U T V X R Q

B

X S P T Q R W V U

C

V W X R Q P S T U

D

T S P W U V X R Q

raph

A) $P \leq W \vee T \vee X \vee R \vee Q$

B) $XSP(TQ)RWVV$

graph

c) VWXRRQPS TU

D) TS PWUV XRXQ

[NAT]

[2-Marks]

#Q. Consider the following graph

Ans: 9

After applying DFS traversal from starting node 'A'. If maximum stack size during DFS is P and number of cross edges are 'Q' then $P + 2Q$ is ____.

NOTE: Visit adjacent nodes in lexicographical order (B before C)

$$n = 8$$

$$8 \times 2 = \underline{\underline{16}}$$

$$P + 2Q = 5 + 2 \times 2 = \underline{\underline{9}}$$

Cross edges: DH, HG
 $\hookrightarrow \textcircled{2}$

$$\left\{ \begin{array}{l} Q = 2 \\ P = 5 \end{array} \right.$$

[MSQ]

[2-Marks]

#Q. Which of the following statements is/are false?

Ans: A, D

- A** In an undirected graph, the shortest path between two nodes always lies on some minimum spanning tree. False
- B** If every edge of the graph has distinct weight, then highest weight spanning tree is unique. True
- C** In Huffman coding, the item with the second lowest probability is always at the leaf that is farthest from the root. True
- D** In Huffman coding, the item with the highest probability is always at a leaf that is the child of the root. False

A)

MCST
→

Shortest Path:- ↓↓

$P \rightarrow S$: 2 ✓

$P \rightarrow S$: $P - Q - R - S$

$= 1 + 1 + 1 = \underline{\underline{3}}$

⑧ Kruskal

max CST

Check option D:

ex: - 1)

P - 10 ✓

Q - 20 ✓

S - 30 X

T = 40
=

Valid

eg 2:

P — 10 ✓
Q — 10 ✓
R — 10
S — 10

~~10, 10~~, 20, 20
