## Topic: ++ and --

L-value is Address of  
a variable

\* ++, -- operators are modifier operators

\* It updates value of a variable

* int a = 5		int b = 10
<span style="border: 1px solid black; padding: 2px;">a = a + 1</span>		-- b or b--; <span style="border: 1px solid black; padding: 2px;">b = b - 1</span>
Same		Same

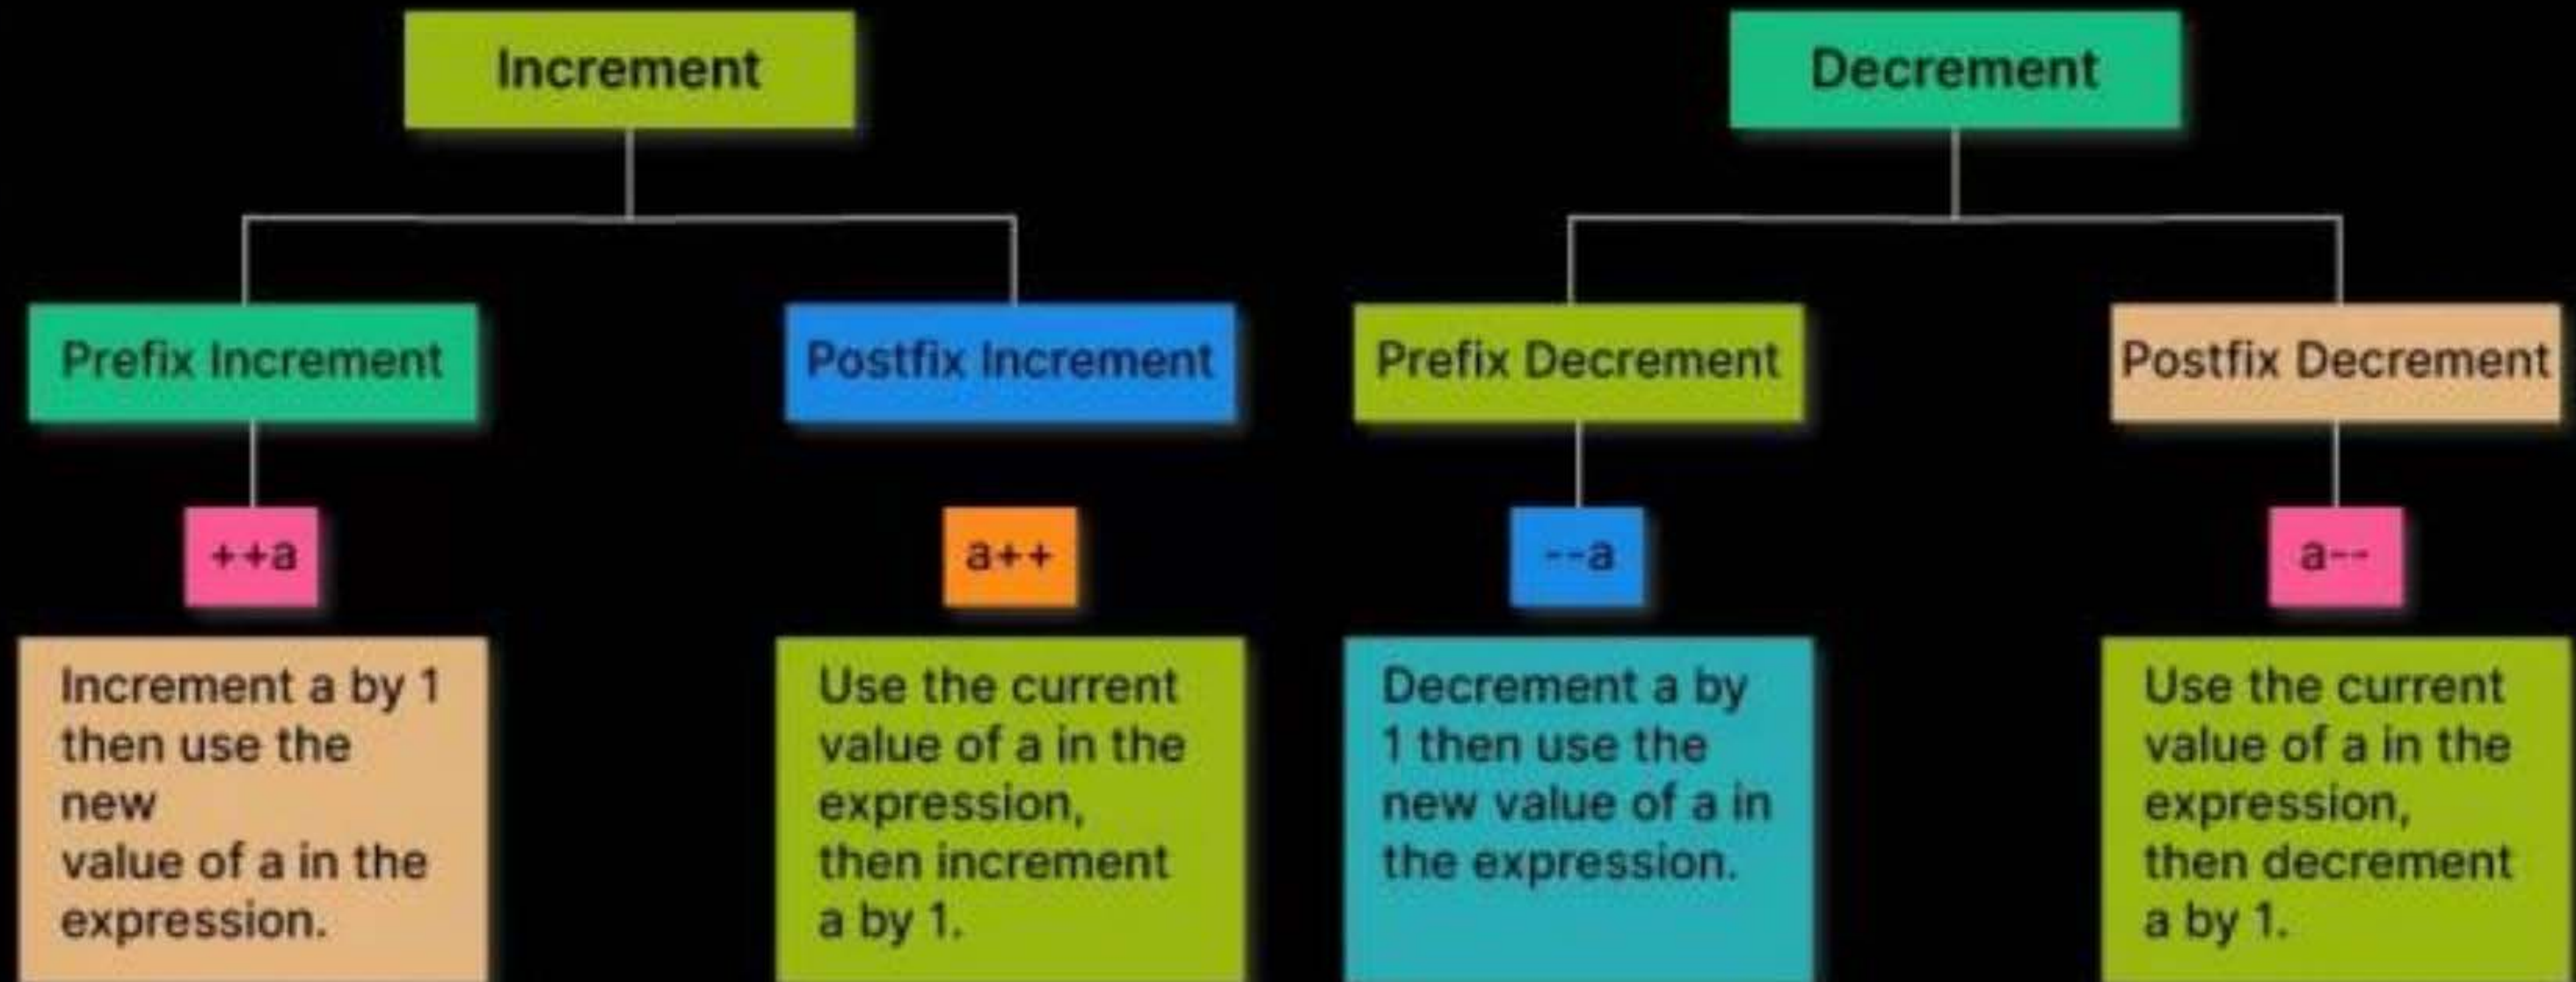

\* ++ operator does not apply to expression, constant

(a + b)++ , 5++;
